*UNIVERSITY COMMITTEE ON  
COURSES AND CURRICULA*

**A MEMORANDUM**

DATE: November 27, 2018  
TO: UCCC Members  
FROM: Dr. Dana Pomykal Franz, Chair  
SUBJECT: December 6, 2018 Meeting

Enclosed are the minutes from the meeting on November 16, 2018 and the agenda and proposals for the meeting on **Thursday, December 6, 2018 beginning at 1:30 p.m.** The meeting will be held in **Room 324 of the Student Union**. Please contact the UCCC office if you are unable to attend.

Thank you.

Enclosures: November 16, 2018 Meeting Minutes  
Course/Curriculum Proposals

**AGENDA**  
**UNIVERSITY COMMITTEE ON COURSES AND CURRICULA**  
**December 6, 2018**

1. Welcome
2. Approval of minutes
3. Course proposals by college/school:

**AGRICULTURE AND LIFE SCIENCES**

**University Committee on Courses and Curricula  
Mississippi State University  
November 16, 2018**

Members

- Present: Amy Adkerson, Tracey Baham, Randy Campbell, Russell Carr, Cody Coyne, Amy Crumpton, Dana Franz, Charles Freeman, Seamus Freyne, Joshua Hartley, Kevin Hunt, Qingmin Meng, Rob Moore, Emily Owen, Prem Parajuli, Tommy Parker, Andy Perkins, Tommy Phillips, Matthew Priddy, Kathy Sherman-Morris, Brad Trinkle, Jacob Tschume, Jenny Turner, Erica Waldman, Jeff Winger, Robert Wolverton, Chien Yu, Matthew Zimmerman
- Excused: John Buol, Padmanava Dash, Trey Howell, Pat Matthes, Marian Swindell
- Absent: Arman Borazjani, Darrell Sparks
- Guests: T. J. Bradford, Tracy Craven, Joe Emerson, Connor Ferguson, Fumiko Joo, Sara Lee, Lynda Moore, Aswathy Rai, Jessica Wells

Franz called the meeting to order at 1:30 p.m. on Friday, November 16, 2018 at 1:30 p.m. in Room 324 of the Student Union. Franz announced a committee report from the Faculty Senate made a recommendation faculty members be allowed to refuse video or audio taping of lectures. Franz indicated that currently the Provost Office encourages faculty members to allow students to video or audio tape a lecture.

Hunt moved to approve the minutes from the October 19, 2018 UCCC meeting. Trinkle seconded the motion. Sherman-Morris moved to amend the minutes to reflect that the Faculty Senate is working on a “recommendation” on the recording of lectures instead of a “policy” on the recording of lectures. Coyne seconded the motion. The motion to amend the minutes was approved unanimously.

Parajuli moved to approve the additions of FLC 3203 Survey of Chinese Literature and FLC 3303 Survey of Chinese Culture. Tschume seconded the motion. Dr. Fumiko Joo appeared in support of the proposals. Committee members discussed that there are no prerequisites for the course, questioned requiring students print course PDFs, and discussed how faculty members grade participation. Franz asked Sherman-Morris to ask the Faculty Senate for feedback on how participation is graded. The motion to approve the addition of FLC 3203 and FLC 3303 was approved unanimously.

Parajuli moved to approve the addition of FLJ 3163 Japanese VI, FLJ 3203 Survey of Japanese Literature, and FLJ 3303 Survey of Japanese Culture. Hunt seconded the motion. The motion to approve the addition of FLJ 3163, FLJ 3203, and FLJ 3303 was approved unanimously.

Parajuli moved to approve the addition of SO 8443 Seminar in Rural Sociology. Crumpton seconded the motion. The subcommittee that reviewed the proposal and committee members questioned whether a

three hour course seminar should be repeated five times for credit as requested and had concerns about how the seminar is going to be different each time. No one appeared in support of the proposal. Carr moved to table the proposal, so a faculty member can appear at the next UCCC meeting to address the UCCC's concerns. Coyne seconded the motion. The motion to table the addition of SO 8443 was approved unanimously.

Parajuli moved to approve the modification of the MS in Chemistry. Tschume seconded the motion. The subcommittee that reviewed the proposal recommended approval. The motion to approve the modification of the MS in Chemistry was approved unanimously.

Perkins moved to approve the modification and addition of distance education to EP 3183 Exercise Psychology. Yu seconded the motion. The subcommittee that reviewed the proposal was concerned the attendance policy in the syllabus does not reference AOP 12.09 and does not discuss excused and unexcused absences as outlined by university policy; the online version section of the syllabus states a student will be penalized 10 points if they do not complete an assignment but does not indicate what happens if part of the assignment is completed; on page 5 of the revised syllabus under Online Discussion, the last sentence of that paragraph should indicate that each post will be worth 10 points towards the final grade in order to match the points assigned under Points for Student Activities. Tschume moved to pass the motion to approve the modification and addition of distance education to EP 3183 contingent upon the above concerns being addressed. Crumpton seconded the motion. The motion to pass contingent was approved unanimously.

Perkins moved to approve the addition of PE 1201 Adapted Physical Activity, the modification of PE 3163 Sport Psychology, and the addition of distance education to PE 3163. Crumpton seconded the motion. The subcommittee that reviewed the proposals was concerned the attendance policies in the syllabi did not reference AOP 12.09; for PE 1201, the catalog description describes the course as a laboratory, but the Method of Instruction selected is lecture/lab, and in the syllabus under heading Credit Hours, it should be "One (1) semester hour;" for PE 3163, in the syllabus under the Topics Covered in the Course, the contact hours for the subtopics for K and Q are not correct based on the main topic contact hours. Tschume moved to pass the motion to approve the addition of PE 1201, the modification of PE 3163, and the addition of distance education to PE3163 contingent upon the above concerns being addressed. Trinkle seconded the motion. The motion to pass contingent was approved unanimously.

Carr moved to approve the addition of distance education to ABE 2543 Precision Agriculture I. Crumpton seconded the motion. The subcommittee that reviewed the proposal noted that the initiator answered the distance education questions on the proposal very well but did not include that information in the syllabus, so the information would be available to students; in the syllabus under the subheading of Exams, it indicates the exams will be worth 300 points but when the three exams are listed separately, the possible exam points do not equal 300 points; in the syllabus under the subheading of Lab Exercises, it indicates the Labs will be worth 300 points with each lab worth 50 points, but there are 10 different labs listed. Parajuli moved to pass the motion to approve the addition of distance education to ABE 2543 contingent upon the above concerns being addressed. Hunt seconded the motion. The motion to pass the motion to approve the addition of distance education to ABE 2543 contingent was approved unanimously.

Carr moved to approve the addition of BCH 4443/6443 Introduction to Public Health and the addition of distance education to BCH 4503/6503 Scientific Communication Skills. Crumpton seconded the motion.

The subcommittee that reviewed the proposals noted for BCH 4443/6443 the undergraduate grading scale overlaps (for example a 90 could be an A or a B, an 80 could be a B or a C, etc.), the graduate grading scale overlaps (for example a 93 could be an A or a B), the graduate students will have two writing assignments but the syllabus does not indicate how the assignments will be included in the grading scale, and it is not clear how often the game Pandemic will be played and when it will be played; for BCH 4503/6503, in the Campus 5 syllabus, it mentions there will be three exams but in the table under Grading on page 3 of the syllabus, the exams are not listed, and it is not clear how the requirements for the graduate students will be different from the undergraduate students. Hunt moved to pass the motion to approve the addition of BCH 4443/6443 and the addition of distance education to BCH 4503/6503 contingent upon the above concerns being addressed. Parajuli seconded the motion. The motion to pass contingent was approved unanimously.

Carr moved to approve the addition of distance education to FDM 2333 Intro to Buying and Management. Trinkle seconded the motion. The subcommittee that reviewed the proposal noted Campus 5 students have three attempts to take each exam and “[t]he highest score among the three attempts will be recorded for the grade.” In the syllabus Campus 1 students are not given the three attempts provision, so there appears to be an equivalency issue between the Campus 1 and Campus 5 offerings. Crumpton moved to pass motion to approve the addition of distance to FDM 2333 contingent upon the above concern being addressed. Hunt seconded the motion. The motion to pass contingent was approved unanimously.

Carr moved to approve the addition of distance education to FDM 4693/6693 Digital Fashion Retailing. Parajuli seconded the motion. The subcommittee that reviewed the proposal recommended approval. The motion to approve the addition of distance education to FDM 4693/6693 was approved unanimously.

Carr moved to approve the addition of distance education to PO 3313 Commercial Poultry Production. Parajuli seconded the motion. The subcommittee that reviewed the proposal recommended approval. The motion to approve the addition of distance education to PO 3313 was approved unanimously.

Carr moved to approve the addition of PSS 8643 Principles of Spray Application and Technology. Parajuli seconded the motion. The subcommittee that reviewed the proposal recommended approval. The motion to approve the addition of PSS 8643 was approved unanimously.

Campbell moved to approve the addition of CSE 4173/6173 Cryptography, the addition of distance education to CSE 4173/6173 Cryptography, the modification of CSE 4383/6383 Network Security, the modification of CSE 4763/6763 Ethical and Legal Issues in Computing, and the addition of distance education to CSE 4763/6763. Moore seconded the motion. The subcommittee that reviewed the proposals noted for CSE 4173 the contact hours add up to 44 instead of 45, the headings on the syllabus for the grading refer to the special topic course numbers, and the attendance policy should have a link to AOP 12.09; for CSE 4383/6383 the contact hours add up to 42 instead of 45 and the attendance policy should have a link to AOP 12.09; for CSE 4763/6763 the attendance policy should have a link to AOP 12.09, the graduate student requirements need clarification, and the grading for graduate students needs to more specific. Carr moved to pass the motion to approve the addition of CSE 4173/6173, the addition of distance education to CSE 4173/6173, the modification of CSE 4383/6383, the modification of CSE 4763/6763, and the addition of distance education to CSE 4763/6763 contingent upon the above

concerns being addressed. Trinkle seconded the motion. The motion to pass contingent was unanimously approved.

Campbell moved to approve the addition of the BS in Cybersecurity. Moore seconded the motion. The subcommittee that reviewed the proposal reported the program outline in the UCCC proposal added up to 125 while the program outline in the Appendix 8 added up to 128 with the difference being CSE 2813 Discrete Structures not being included in the UCCC proposal. Another committee member pointed out MA 4143 Graph Theory had been included in the UCCC proposal under electives but was not included in the Appendix 8. Hunt moved to pass the motion to approve the addition of the BS in Cybersecurity contingent upon the above concerns being addressed. Crumpton seconded the motion. The motion to pass contingent was unanimously approved.

Hunt moved to adjourn the meeting. Crumpton seconded the motion. The motion to adjourn was unanimously approved.

The meeting was approved at 2:58 p.m.

APPROVAL FORM FOR  
**DEGREE PROGRAMS**  
MISSISSIPPI STATE UNIVERSITY

**NOTE:** This form is a cover sheet that must accompany the degree program change proposal. The actual proposal should be prepared in accordance with format requirements provided in the *Guide and Format for Curriculum Proposals* published by the UCCC. Both cover sheet and proposal should be submitted to UCCC Mail Stop 9702 (281 Garner Hall), Phone: 325-9410.

**College:** Bagley College of Engineering      **Department:** Aerospace Engineering

**Contact Person:** Machaunda Bush      **Mail Stop:** 9549      **E-mail:**  
mb2@msstate.edu

**Nature of Change:** Curriculum Change      **Date Initiated:** 10/2/2018      **Effective Date:**  
8/1/2019

**Current Degree Program Name:** Aerospace Engineering

**Major:** Aerospace Engineering      **Concentration:** Aeronautics or Astronautics

**New Degree Program Name:**

**Major:**      **Concentration:**

**Summary of Proposed Changes:**

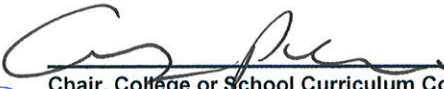

This proposal aims to modify the degree requirements for the Bachelor of Science in Aerospace Engineering by removing an existing course (PH 2233 Physics III) and adding a new course (CSE 1233 Programming with C) to the curriculum

Approved:

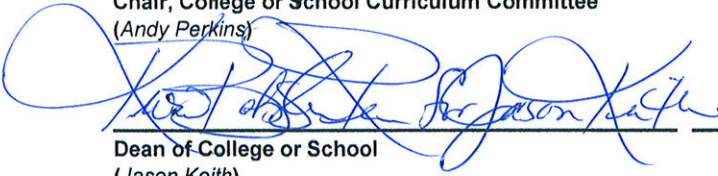

Date:

Chair, Deans Council

## **1. CATALOG DESCRIPTION**

### ***Current Catalog Description of Degree Program:***

Department Head: Dr. Davy Belk  
Academic Coordinator: Ms. Machaunda Bush  
Office: 330 Walker Engineering Building

The Department of Aerospace Engineering at Mississippi State University provides an accredited undergraduate curriculum with the mission of preparing students to enter the workplace as qualified entry-level aerospace engineers or to enter any aerospace engineering graduate program adequately prepared for advanced study. This mission is accomplished by a strong foundation in mathematics and physical and engineering sciences upon which student problem-solving and application skills are developed. The curriculum stresses analytical and communication skills, with particular emphasis placed on engineering design throughout the curriculum. A capstone design experience in the senior year provides the opportunity to integrate design, analytical, and problem-solving skills along with communication skills in a team environment that emulates aerospace engineering practice.

The mission is accomplished by the following educational objectives, which describe the career and professional accomplishments we are preparing our graduates to achieve. Our graduates shall:

1. Demonstrate an understanding of engineering principles and an ability to solve unstructured engineering problems that will allow them to successfully enter into and advance in the engineering profession;
2. Demonstrate an appreciation for lifelong learning and for the value of continuing professional development through continual study of the current literature in the field, participation in graduate education, professional education or continuing education opportunities, attainment of professional licensure, or membership in professional societies;
3. Demonstrate an understanding of professional and ethical responsibilities to the profession, society, and the environment incumbent on an engineering professional;
4. Successfully interact with others of different backgrounds, educations, and cultures;
5. Demonstrate effective communication skills in their profession.

These objectives are accomplished in two different concentrations in the aerospace engineering curriculum, an aeronautics concentration and an astronautics concentration. The concentration in aeronautics focuses on the analysis and design of aircraft and other vehicles that operate primarily within the earth's atmosphere, and the concentration in astronautics focuses on the analysis and design of spacecraft and other vehicles that operate primarily outside the earth's atmosphere. A student in aerospace engineering will choose one of these two concentrations upon choosing the aerospace engineering major.

The aerospace engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

### ***New Catalog Description of Degree Program:***

Department Head: Dr. Davy Belk  
Academic Coordinator: Ms. Machaunda Bush  
Office: 330 Walker Engineering Building

The Department of Aerospace Engineering at Mississippi State University provides an accredited undergraduate curriculum with the mission of preparing students to enter the workplace as qualified entry-level aerospace engineers or to enter any aerospace engineering graduate program adequately prepared for advanced study. This mission is accomplished by a strong foundation in mathematics and physical and engineering sciences upon which student problem-solving and application skills are developed. 5. Demonstrate effective communication skills in their profession.

These objectives are accomplished in two different concentrations in the aerospace engineering curriculum, an aeronautics concentration and an astronautics concentration. The concentration in aeronautics focuses on the analysis and design of aircraft and other vehicles that operate primarily within the earth's atmosphere, and the concentration in astronautics focuses on the analysis and design of spacecraft and other vehicles that operate primarily outside the earth's atmosphere. A student in aerospace engineering will choose one of these two concentrations upon choosing the aerospace engineering major.

The aerospace engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

## **DESCRIPTION OF CHANGES**

Currently, PH 2233 is a required elective for aerospace students. It is proposed that PH 2233 be replaced by CSE 1233 in the catalog. In addition, it is proposed that 'Humanities Elective' from the freshman year be exchanged with CSE 1233 from the sophomore year.

**Current Course:** PH 2233 (Prerequisite: PH 2223). Two hours lecture, one hour recitation, two hours laboratory. Calculus-based course in simple harmonic motion, waves, optics and an introduction to modern physics. Laboratory emphasizes optics and electronics.

**New Course:** CSE 1233 (Prerequisite: MA 1313 or equivalent). Three hours lecture. Problem-solving methods, algorithm development, debugging and documentation in the C Programming language; applications. (Not recommended to students with credit in CSE 1213 or CSE 1233 or equivalent).

## **JUSTIFICATION FOR CHANGE:**

- Based on feedback from the aerospace industry, our undergraduate students need to know how to program on computers to solve engineering problems and to be able to understand some of the codes that are currently being used in industry and national labs.
- Many of the homework assignments and projects in the [sophomore,] junior and senior years involve computer programming, and it was found that most of the aerospace students lack programming knowledge.

BAGLEY  
COLLEGE OF ENGINEERING

DEPARTMENT OF  
COMPUTER SCIENCE & ENGINEERING

Dr. Sarah B. Lee  
Associate Clinical Professor  
sblee@cse.msstate.edu

April 10, 2018

University Committee on Courses and Curricula  
Mississippi State University

Subject: Letter of Support

Dear Dr. Franz:

The Department of Computer Science and Engineering is supporting the introduction of CSE 1233 – “Computer Programming with C” in the curriculum proposed by the Department of Aerospace Engineering. We are aware of the potential increase of the student enrollment in this class, and look forward to opening new sections to accommodate the incoming ASE students.

Please do not hesitate to contact me if you need additional information.

Sincerely,

Dr. Sarah Lee  
Assistant Department Head  
Director of Undergraduate Studies  
Computer Science & Engineering

APPROVAL FORM FOR

# DEGREE PROGRAMS

MISSISSIPPI STATE UNIVERSITY

**NOTE:** This form is a cover sheet that must accompany the degree program change proposal. The actual proposal should be prepared in accordance with format requirements provided in the *Guide and Format for Curriculum Proposals* published by the UCCC. Both cover sheet and proposal should be submitted to UCCC Mail Stop 9702 (281 Garner Hall), Phone: 325-9410.

**College:** Bagley College of Engineering      **Department:** Computer Science & Engineering

**Contact Person:** Sarah B. Lee      **Mail Stop:** 9637      **E-mail:**  
sblee@cse.msstate.edu

**Nature of Change:** Modification      **Date Initiated:** 10/31/2018      **Effective Date:** 8/1/2018

**Degree to be offered at:** Starkville campus

**Current Degree Program Name:** B.S.

**Major:** Computer Science      **Concentration:**

**New Degree Program Name:**

**Major:**      **Concentration:**

**Summary of Proposed Changes:**

The science and math requirements are being changed. The total number of hours required for math and science remains the same. The international/intercultural elective is also being removed and additional free electives are being added.

**Approved:**

3. JUSTIFICATION AND STUDENT LEARNING OUTCOMES

This modification is being made in order to provide additional alternatives for CS major technical electives. Recognizing the need for business expertise for some computing career paths, courses in the College of Business -Business Information Systems department were evaluated for inclusion as technical electives.

- Will this program change meet local, state, regional, and national educational and cultural needs? **No**
- Will this program change result in duplication in the System? **No**
- Will this program change/advance student diversity within the discipline? **No.**
- Will this program change result in an increase in the potential placement of graduates in MS, the Southeast, and the U.S.? **No**
- Will this program change result in an increase in the potential salaries of graduates in MS, the Southeast, and the U.S.? **No**

The learning outcomes of the program, listed below, remain the same:

## DEGREE MODIFICATION PROPOSAL

1. The graduate will demonstrate an understanding of computer science principles and an ability to solve unstructured computer science problems through the successful entrance into and advancement in the computer science profession.
2. The graduate will demonstrate an appreciation for lifelong learning and for the value of continuing professional development through participation in graduate education, professional education or continuing education opportunities, attainment of professional licensure, or membership in professional societies.
3. The graduate will demonstrate an understanding of professional and ethical responsibilities to the profession, society and the environment incumbent on a computer science professional.
4. The graduate will successfully interact with others of different backgrounds, educations, and cultures.
5. The graduate will demonstrate effective communication skills in their profession.

Dr. Franz:

Please find attached a proposal to modify the requirements for the BS in Computer Science and the BS in Software Engineering. The Computer Science and Engineering faculty voted unanimously (18 present, 3 absent) to approve these changes at the faculty meeting on September 28, 2018.

Please feel free to contact me if there are any questions or concerns.

Sincerely,

Andy D. Perkins, Ph.D.

| <p>Software Engineering is the application of engineering practices to the design and maintenance of software. The Software Engineering degree program prepares students for careers in the engineering of large complex software systems and products. These systems often involve millions of lines of code and frequently operate in safety-critical environments. The Software Engineering major contains courses related to the study of software engineering in practice necessary to manage these development processes. The faculty for the Software Engineering program is drawn from the Department of Computer Science and Engineering and the Department of Industrial Engineering.</p> <p>The objectives for the department with respect to the Bachelor of Science Degree in Software Engineering are as follows:</p> <ol style="list-style-type: none"> <li>1. The graduate will demonstrate an understanding of engineering principles and an ability to solve unstructured engineering problems through the successful entrance into and advancement in the engineering profession.</li> <li>2. The graduate will demonstrate an appreciation for lifelong learning and for the value of continuing professional development through participation in graduate education, professional education or continuing education opportunities, attainment of professional licensure, or membership in professional societies.</li> <li>3. The graduate will demonstrate an understanding of professional and ethical responsibilities to the profession, society and the environment incumbent on an engineering professional.</li> <li>4. The graduate will successfully interact with others of different backgrounds, educations, and cultures.</li> <li>5. The graduate will demonstrate effective communication skills in their profession.</li> </ol> <p>The software engineering program is accredited by the Engineering Accreditation Commission of ABET, <a href="http://www.abet.org">http://www.abet.org</a>.</p> |                | <p>Software Engineering is the application of engineering practices to the design and maintenance of software. The Software Engineering degree program prepares students for careers in the engineering of large complex software systems and products. These systems often involve millions of lines of code and frequently operate in safety-critical environments. The Software Engineering major contains courses related to the study of software engineering in practice necessary to manage these development processes. The faculty for the Software Engineering program is drawn from the Department of Computer Science and Engineering and the Department of Industrial Engineering.</p> <p>The objectives for the department with respect to the Bachelor of Science Degree in Software Engineering are as follows:</p> <ol style="list-style-type: none"> <li>1. The graduate will demonstrate an understanding of engineering principles and an ability to solve unstructured engineering problems through the successful entrance into and advancement in the engineering profession.</li> <li>2. The graduate will demonstrate an appreciation for lifelong learning and for the value of continuing professional development through participation in graduate education, professional education or continuing education opportunities, attainment of professional licensure, or membership in professional societies.</li> <li>3. The graduate will demonstrate an understanding of professional and ethical responsibilities to the profession, society and the environment incumbent on an engineering professional.</li> <li>4. The graduate will successfully interact with others of different backgrounds, educations, and cultures.</li> <li>5. The graduate will demonstrate effective communication skills in their profession.</li> </ol> <p>The software engineering program is accredited by the Engineering Accreditation Commission of ABET, <a href="http://www.abet.org">http://www.abet.org</a>.</p> |                |

3. JUSTIFICATION AND STUDENT LEARNING OUTCOMES

This modification is being made in order to provide additional alternatives for SE major technical electives. Recognizing the need for business expertise for some computing career paths, courses in the College of Business -Business Information Systems department were evaluated for inclusion as technical electives. In addition, math courses are being added to match the technical elective requirements in the CS major.

- Will this program change meet local, state, regional, and national educational and cultural needs? **No**
- Will this program change result in duplication in the System? **No**
- Will this program change/advance student diversity within the discipline? **No**.
- Will this program change result in an increase in the potential placement of graduates in MS, the Southeast, and the U.S.? **No**

## DEGREE MODIFICATION PROPOSAL

- Will this program change result in an increase in the potential salaries of graduates in MS, the Southeast, and the U.S.? **No**

The learning outcomes of the program, listed below, remain the same:

1. Graduates will demonstrate an ability to apply knowledge of mathematics, science, and engineering
2. Graduates will demonstrate an ability to design and conduct experiments, as well as to analyze and interpret data
3. Graduates will demonstrate an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
4. Graduates will demonstrate an ability to function on multidisciplinary teams
5. Graduates will demonstrate an ability to identify, formulate, and solve engineering problems
6. Graduates will demonstrate an understanding of professional and ethical responsibility
7. Graduates will demonstrate an ability to communicate effectively
8. Graduates will demonstrate the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
9. Graduates will demonstrate a recognition of the need for, and an ability to engage in life-long learning
10. Graduates will demonstrate a knowledge of contemporary issues
11. Graduates will demonstrate an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

University Committee on Courses and Curricula  
PO Box 5268  
Mississippi State, MS 39762

Dr. Franz:

Please find attached a proposal to modify the requirements for the BS in Computer Science and the BS in Software Engineering. The Computer Science and Engineering faculty voted unanimously (18 present, 3 absent) to approve these changes at the faculty meeting on September 28, 2018.

Please feel free to contact me if there are any questions or concerns.

Sincerely,

Andy D. Perkins, Ph.D.  
*CSE Courses and Curricula Chair*

## 1. Catalog Description

Graduate study is offered in the Department of Computer Science and Engineering leading to the degrees of Master of Science in Computer Science, Master of Science in Cyber Security and Operations, and Doctor of Philosophy in Computer Science.

The program of study of a Master of Science in Computer Science degree includes advanced courses in computer science that are selected according to the goals of the student. The program of study includes a thesis option, a professional project option, or courses-only option. The program of study of a Doctor of Philosophy (Ph.D.) in Computer Science degree includes advanced courses in computer science and significant scholarly research in computer science, presented in a dissertation. Applicants with bachelor degrees can apply for direct admission to the Ph.D. program. Applicants with master's degrees are also welcome.

The department's core research areas include the following.

- Artificial intelligence
- Computational science
- Graphics
- Human centered computing
- Software engineering and systems

These core competencies support research applications in areas such as bioinformatics, visualization, computer security and forensics, human-computer interactions and high performance computing. Faculty, research assistants, thesis students, and dissertation students participate in a wide variety of research projects. Many research projects are multi-disciplinary or multi-specialty in nature.

## 2. Graduate Degree Curriculum Outline

Deletions in *italics>* and additions in **bold>**.

| CURRENT Degree Description  | PROPOSED Degree Description   |
|---|---|
| Degree: Computer Science<br>Major: MS (Thesis & Non-Thesis)<br>Concentrations: None | Degree: Computer Science<br>Major: MS (Thesis & Non-Thesis)<br>Concentrations: None |

*(All current contents are being removed for simplification. As admission requirements, prereqs, and so forth are not required to be part of the catalog (and require UCCC approval to be changed), these are being excised and moved to our Graduate Handbook.)*

**Graduate study is offered in the Department of Computer Science and Engineering leading to the degrees of Master of Science in Computer Science, Master of Science in Cyber Security and Operations, and Doctor of Philosophy in Computer Science.**

**Masters and PhD in Computer Science**

**The program of study of a Master of Science in Computer Science degree includes advanced courses in computer science that are selected according to the goals of the student. A thesis requires 6 hours of CSE 8000 under the guidance of a thesis director as per the Catalog.</p> <p>Any required courses in the Core or a Specialization previously completed by a student may be applied for completion and replaced with another free course of the student's and committee's choosing</p> <p>A minimum of 15 credit hours of the courses in the total program of study must be at the full graduate level (numbered 8000 or 9000).</p> | 12 |
| Total Hours  | 31 | Total Hours   | 31 |

### 3. Justification and Student Learning Outcomes

These changes simplify the description our our MS program, tie courses to our faculty's focus areas in a manner similar to our PhD program, and make the admissions in line with future changes to our BS degrees. No changes to the number of course hours or to the courses offered are being made.

Admission Changes: Recent proposed changes to our BS programs are moving to drop the requirement for MA 2733: Cal III in the program. If it is removed from our BS programs, we need to remove it from our Graduate programs or put our students in situation where they are not eligible for our program. In addition, the number of our requirements made it difficult to admit students or have them graduate in a timely manner; it is also not in line with Peer institutions (we currently have the most of those surveyed). Thus, additional simplifications were made: Microprocessors and Programming Languages were removed; Formal Languages was moved to be an option with Algorithms. This set of prerequisites cover the requirements of our focus area courses and are in line with Peer/

Peer+ universities.

Change of Structure: Instead of a Fundamental Area/Theory/Seminar/Additional Courses structure, we now have a Core/Primary Specialization/Secondary Specialization/Additional Courses structure. This structure is in line with our PhD program (which already requires specializations) and thus benefits students transitioning from an MS to a PhD here. A list of suggested specializations will be kept in the department as a live document, allowing us to update it as faculty and department needs change. The courses previously in the Fundamental areas are all requirements for some specialization on the list.

#### **4. Support**

A letter of support from the Graduate Coordinator of the Department of Computer Science and Engineering is attached.

#### **5. Proposed 4-Letter Abbreviation**

The MSU registrar has adopted CS as the abbreviation of Computer Science degrees.

#### **6. Effective Date**

Mailstop 9702  
Mississippi State University

UCCC Committee,

With this letter, the Department of Computer Science & Engineering requests changes to the admission requirements for our CS MS & PhD degrees and our CYSO MS degree. Similarly, we request changing the structure in terms of courses required for all three degrees to better serve our students and ensure they graduate in a timely fashion. Edits and classifications to our Catalog entries are also provided. These modifications were approved by the faculty of Computer Science & Engineering at our faculty meeting on Thursday, November 1st, 2018.

Please do not hesitate to contact me if additional information is needed.

Sincerely yours,

Dr. T.J. Jankun-Kelly

## 1. Catalog Description

The Master of Science in Cyber Security and Operations is designed for students who wish to help meet the challenges posed by increasing cyber-threats. Using a multidisciplinary approach, the program is designed to provide students with a focused education within a broad analytical framework for evaluating, understand, and solving cyber security problems. Either concentration will allow a thesis or non-thesis option.

The Cyber Defense concentration will focus on those aspects of cyber security needed to prepare an enterprise level system to protect itself. Material will prepare the students for developing cyber security policies to comply with existing and future laws, conducting risk assessment in enterprise to determine compliance with requirements and implementing security solutions for the enterprise.

The Cyber Operations concentration will focus on those aspects of cyber security that are needed to operate in the cyber domain. Material will prepare the student for advanced operations in the cyber domain such as penetration testing, after action analysis, and malware analysis. This concentration is designed to satisfy the requirements for the Center of Academic Excellence in Cyber Operations program of the Department of Defense.

## 2. Graduate Degree Curriculum Outline

Deletions in *italics>* and additions in **bold>**.

| CURRENT Degree Description  | PROPOSED Degree Description   |
|---|---|
| Degree: Cyber Security and Operations<br>Major: MS (Thesis & Non-Thesis)<br>Concentrations: Cyber Defense, Cyber Operations | Degree: Cyber Security and Operations<br>Major: MS (Thesis & Non-Thesis)<br>Concentrations: Cyber Defense, Cyber Operations |

*(There is no separate catalog description for CYSO as it is part of the CS Graduate Catalog entry. As with the proposed CS Graduate degree changes, all current contents are being removed for simplification. As admission requirements, prereqs, and so forth are not required to be part of the catalog (and require UCCC approval to be changed), these are being excised and move to our Graduate Handbook.)*

**Graduate study is offered in the Department of Computer Science and Engineering leading to the degrees of Master of Science in Computer Science, Master of Science in Cyber Security and Operations, and Doctor of Philosophy in Computer Science.**

**Cyber Security And Operations**

**The Master of Science in Cyber Security and Operations is designed for students who wish to help meet the challenges posed by increasing cyber-threats. The Cyber Defense concentration will focus on those aspects of cyber security needed to prepare an enterprise level system to protect itself; while the Cyber Operations concentration will focus on those aspects of cyber security that are needed to operate in the cyber domain. Using a multidisciplinary approach, the program is designed to provide students with a focused education within a broad analytical framework for evaluating, understand, and solving cyber security problems. Either concentration will allow a thesis or non-thesis option.**

**MS applicants are required to have a 3.0 GPA in overall undergraduate work and complete the GRE to the committee’s satisfaction before admission; international students require a suitable demonstration of English proficiency. Candidates for the master’s degree must have completed all prerequisite courses or their equivalent. For additional details, consult the CS Department’s Graduate Handbook.**

| Total Hours   | 31 | Total Hours   | 31                    |

### 3. Justification and Student Learning Outcomes

Primarily, these changes address the fact that this program is over specified in terms of courses: Only 6 of the 31 credit hours have any flexibility for one concentration (12/31 for the other). This makes it difficult for students to graduate in a timely fashion due to faculty time constraints. A live list of relevant courses to each concentration will be kept in our Graduate Handbook for students to satisfy their degree programs.

Admission Changes: To identify our degree as an engineering focused Cyber degree, we have added the requirement for a theory course to the degree for admission. This is in line with other Peer/Peer+ programs and allows our CYSO students more options when choosing CS electives that have those as a requirement. This information will be kept up to date in our Graduate Handbook.

### 4. Support

A letter of support from the Graduate Coordinator of the Department of Computer Science and Engineering is attached.

### 5. Proposed 4-Letter Abbreviation

The MSU registrar has adopted CYSO as the abbreviation of Cyber Operation degrees.

## 1. Catalog Description

Graduate study is offered in the Department of Computer Science and Engineering leading to the degrees of Master of Science in Computer Science, Master of Science in Cyber Security and Operations, and Doctor of Philosophy in Computer Science.

The program of study of a Master of Science in Computer Science degree includes advanced courses in computer science that are selected according to the goals of the student. The program of study includes a thesis option, a professional project option, or courses-only option. The program of study of a Doctor of Philosophy (Ph.D.) in Computer Science degree includes advanced courses in computer science and significant scholarly research in computer science, presented in a dissertation. Applicants with bachelor degrees can apply for direct admission to the Ph.D. program. Applicants with master's degrees are also welcome.

The department's core research areas include the following.

- Artificial intelligence
- Computational science
- Graphics
- Human centered computing
- Software engineering and systems

These core competencies support research applications in areas such as bioinformatics, visualization, computer security and forensics, human-computer interactions and high performance computing. Faculty, research assistants, thesis students, and dissertation students participate in a wide variety of research projects. Many research projects are multi-disciplinary or multi-specialty in nature.

## 2. Graduate Degree Curriculum Outline

Graduate study is offered in the Department of Computer Science and Engineering leading to the degrees of Master of Science in Computer Science, Master of Science in Cyber Security and Operations, and Doctor of Philosophy in Computer Science.

#### **Masters and PhD in Computer Science**

The program of study of a Master of Science in Computer Science degree includes advanced courses in computer science that are selected according to the goals of the student. The program of study includes a thesis option, a professional project option, or courses-only option. The program of study of a Doctor of Philosophy (Ph.D.) in Computer Science degree includes advanced courses in computer science and significant scholarly research in computer science, presented in a dissertation.

The department's core research areas include the following.

- Artificial intelligence
- Computational science
- Graphics
- Human centered computing
- Software engineering and systems

These core competencies support research applications in areas such as bioinformatics, visualization, computer security and forensics, human-computer interactions, robotics, and high performance computing. Faculty, research assistants, thesis students, and dissertation students participate in a wide variety of research projects. Many research projects are multi-disciplinary or multi-specialty in nature.

An entering PhD student with an MS degree should have a 3.50/4.00 grade point average on MS work, while a PhD student entering with only a BS degree is expected to have a 3.50/4.00 on overall undergraduate work. A student with a lower GPA may still be eligible for admission based on outstanding qualifications in other areas. A student must complete the GRE to the committee's satisfaction before admission; international students require a suitable demonstration of English proficiency. Candidates for the PhD degree must have completed all prerequisite courses or their equivalent. Finally, a student must possess those qualifications and research interests that indicate to the Computer Science and Engineering Graduate Studies Committee that the applicant will be successful in the computer science doctoral program. For additional details, consult the CS Department's Graduate Handbook.

### 3. Justification and Student Learning Outcomes

These changes make the admissions in line with future changes to our BS degrees, add a differential admit option in line with the College, and raise the GPA requirement in line with the College. No changes to the number of course hours or to the courses offered are being made.

Admission Changes: Recent proposed changes to our BS programs are moving to drop the requirement for MA 2733: Cal III in the program. If it is removed from our BS programs, we need to remove it from our Graduate

programs or put our students in situation where they are not eligible for our program. In addition, the number of our requirements made it difficult to admit students or have them graduate in a timely manner; it is also not in line with Peer institutions (we currently have the most of those surveyed). Thus, additional simplifications were made: Microprocessors and Programming Languages were removed; Formal Languages was moved to be an option with Algorithms. This set of prerequisites cover the requirements of our focus area courses and are in line with Peer/Peer+ universities. Additionally, a differential admit option to the PhD program was added due to changes at the Graduate School requiring programs without differential admission to transfer coursework formally into CAPP—a burden the faculty did not feel was appropriate for our program. Other BCoE programs also have such an option so we are now in line with the rest of the College. Finally, the GPA requirement was raised to be in line with other Peer/Peer+ and BCoE programs; students that may have been direct PhD admits before with a lower GPA may now enter via completion of the MS. While this may decrease our PhD numbers initially, we foresee a stronger pool for better retention and research (and thus publications, grants, and post-graduate success).

For simplified differences between the direct and MS PhD admits, for Direct Admit PhD students, the program of study requires 63 credit hours (the same as our current program):

- 7 hours in the CS Core (Seminar & Theory)
- 15 hours in the Primary Specialization
- 9 hours in the Secondary Specialization
- 12 free course hours
- 20 dissertation hours

For PhD students with a previous masters, the program of study requires 32 credit hours post MS degree:

- 3–4 hours in the CS Core (Seminar & Theory)
- 6 hours in the Primary Specialization, of which at least 3 must be full graduate hours
- 3 hours in the Secondary Specialization
- 20 dissertation hours

Change of Structure: Fundamental courses were removed but added to our list of courses of specializations; they are also still listed a part of our Qualifying Exam structure in our Graduate Handbook. In addition, the structure of the specializations was modified to allow easier transition from MS to PhD from State via the choices made in the non-direct admit option. As we do currently, a list of suggested specialization will be kept in the department as a live document, allowing us to update it as faculty and department needs change. The courses previously in the Fundamental areas are all requirements for some specialization on the list.
